SUMMARY

Full-stack developer with 1+ years of experience building scalable web applications using React, TypeScript, Node.js, and AWS-native technologies . Experienced in developing real-time applications, REST and GraphQL APIs, and cloud-based solutions using AWS Amplify, AppSync, DynamoDB, Lambda, and EventBridge. Skilled in MongoDB, PostgreSQL, MySQL, Redis, and Docker.

SKILLS

Languages: JavaScript, TypeScript
Frontend: React, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, REST, GraphQL
Databases: MongoDB, PostgreSQL, MySQL, Redis
Cloud: AWS Amplify, AppSync, DynamoDB, Lambda, EventBridge, Cognito, API Gateway, S3
DevOps & Tools: Docker, Git

WORK EXPERIENCE

Aug 2025 –May 2026

MERN Stack Developer — Webbugs

- Built an Invoice Generator application end-to-end using React and AWS Amplify, leveraging AWS cloud infrastructure for application deployment and backend services
- Developed and maintained a Pakistan Stock Exchange (PSX) trading dashboard, building interactive React components and real-time market data interfaces.
- Worked across frontend and full-stack development, building responsive user interfaces and integrating APIs and backend services based on project requirements.
- Developed clean, maintainable application architecture and contributed to multiple client-facing projects

May 2025 – Jul 2025

Front-End Intern — Meta Melon

- Built reusable React components for dynamic dashboard and portfolio experiences, improving consistency and development speed for future features.
- Integrated REST APIs and optimized responsive interfaces with Tailwind CSS, reducing layout inconsistencies across screen sizes.
- Enhanced interactive user experiences with Framer Motion animations and collaborated with design and backend teams to translate Figma mockups into pixel-accurate interfaces.

POROJECTS

UPTIMECONSOLE — REAL-TIME UPTIME MONITORING PLATFORM

REACT, TYPESCRIPT, AWS AMPLIFY GEN 2, APPSYNC, DYNAMODB, LAMBDA, COGNITO, API,

- Built a real-time uptime monitoring platform on serverless AWS infrastructure with owner-based authorization.
- Implemented scheduled health checks with EventBridge and SNS-based downtime notifications.
- Created an AWS Console-inspired React and TypeScript interface with inline detail panels for monitor management

KEEPER — FULL-STACK NOTES APPLICATION

REACT, TYPESCRIPT, NODE.JS, MYSQL, REDIS, SOCKET.IO

- Built a full-stack notes application with a masonry card UI and real-time synchronization.
- mplemented JWT refresh-token rotation, Google/GitHub OAuth, and MFA through TOTP, email OTP, and WebAuthn/Passkeys.
- Added cron reminders, Stripe billing, internationalization, Swagger API documentation, and Docker deployment

https://keeper04.netlify.app

Relay — Real-Time Chat Application

REACT, TYPESCRIPT, NODE.JS, MONGODB, SOCKET.IO

- Built a full-stack chat application with instant messaging over WebSockets and JWT-based authentication.
- Designed a structured REST API backend and deployed the application with a monorepo architecture separating frontend and backend
